## AP HUMAN GEOGRAPHY EXAM REVIEW

## The AP Exam

- 2 hrs, 15 mins
- Section 1: MCQs

## 50\% MCQ

- 60 minutes
- 75 questions
- Section 2: FRQs

## $50 \%$ FRQ

- 75 minutes
- 3 questions

## Section 1: Multiple Choice Tips

- Scores are based how many you get right - No points are deducted for wrong answers
-So ANSWER EVERY QUESTION- don't leave ny blank!

## Section 1: Multiple Choice Tips

- Read carefully!
- Eliminate as many answer choices as possible
- Let's practice a couple...

## Section 2: Free Response Questions

- You have 75 minutes to answer all 3 questions
- You should spend 25 minutes on each
- Read the question carefully before you answer.

## Section 2: Free Response Questions

- You must write in complete sentences, but it does not need to be a formal essay.
- If you are given three parts to a question ( $A, B, C . .$. ) organize your answers in the same way
- You may NOT bullet your answers... even if they ask to "list".

## Practice FRQ: 2010

3. The population pyramids above represent two countries at different stages of the demographic transition and economic development.
A. Explain the demographic characteristics of each country above with respect to the demographic transition model.
B. Discuss ONE positive impact of EACH country's population structure on its economic development.
C. Discuss ONE negative impact of EACH country's population structure on its economic development.

The population pyramids above represent two countries at different stages of the demographic transition and economic development.

Part A (2 points)
Explain the demographic characteristics of each country above with respect to the demographic transition model.

- Must mention Stage 2 (second or early expanding stage) AND elaborate briefly about its characteristics, such as high birth rate, falling death rate, youthful population, developing country.

## Country A

- It is not acceptable to suggest Stages 1 or 3 for Country A.
- Must mention Stage 4 (fourth, final, or low stationary stage) AND elaborate briefly about its characteristics, such as low birth rate, low death rate, aging population, developed country.
Country B
- It is acceptable to mention a possible Stage 5 (fifth stage) for Country B.

Part B (2 points)
Discuss ONE positive impact of EACH country's population structure on its economic development.
Country A

- Expanding or large workforce
(1 point)
- Youthful population, which can spark creativity, receptivity to change, etc.
- Less need for immigrant labor
- Less need for elder social safety net (e.g., Social Security)

Country B

- Educated (skilled, experienced, etc.) workforce
(1 point)
- Low youth dependency ratio
- More women in the compensated workforce
- Tendency to spend discretionary income on needs other than education
- Might need immigrant labor, which would allow citizens to take higher-order jobs

Part C (2 points)
Discuss ONE negative impact of EACH country's population structure on its economic development.
Country A

- High youth dependency ratio
(1 point)
- Strain on resources, the environment or society owing to rapid population growth
- Low literacy rate for women
- Fewer women in the compensated workforce

Country B

- High elder dependency ratio
(1 point)
- Possible future labor shortage
- Greater need to fund elder social safety net (e.g., Social Security)

## Exam Scores

## Unit 1

## Geography: Its Nature and Perspectives

## 5-10\% of the AP Exam

## The 5 Themes

- Location
- Place
- Human/Environment Interaction
- Movement
- Regions

## The 5 Themes

- Location
- Absolute
- Relative
- Place
- Human/Environment Interaction
- Movement
- Regions

## The 5 Themes

- Location
- Place
- Toponyms- place names
- Site- location based on characteristics
- Situation- relative location
- Human/Environment Interaction
- Movement
- Regions

## The 5 Themes

- Location
- Place
- Human/Environment Interaction
- Movement
- Migration
- Communication, transportation, trade
- Regions

## The 5 Themes

- Location
- Place
- Human/Environment Interaction
- Movement
- Regions
- Formal
- Functional
- Perceptual

## Scale

- Small scale = small detail
- Large scale= large detail

## Important lines of latitude

- Equator: 0 degrees

Parallels are circular
lines used to indicate latitude

## Tropic of Cancer: 23.5 degrees North

Tropic of Capricorn: 23.5 degrees South

- Arctic Circle: 66.5 degrees North
- Antarctic Circle: 66.5 degrees South

## important lines of longitude

- Prime Meridian: 0 degrees (runs through Greenwich, England)
- International Dateline: 180 degrees
- Time Zones: every 15 degrees of longitude equals one hour

(b)

## Time Zones

- http://www.timezonecheck.com/
- http://www.bbc.co.uk/news/world-12849630

## Geographic Information

 System:a collection of computer hardware and software that permits storage and analysis of layers of spatial data.

## Space-Time Compression, 1492-1962

The times required to cross the Atlantic, or orbit the earth, illustrate how transport improvements have shrunk the world.

## When contact diminishes with increasing distance and eventually disappears.

## Distance Decay

Figure 4.3. Distance decay curve showing decreasing interaction as distance increases.

## Thematic Maps

## World Population Cartogram

## Space: Distribution of Features

©SSpatial Distribution-The regular arrangement of a phenomenon across Earth's surface.

- Three features
- (1)Density
- (2)Concentration
- (3)Pattern

## Diffusion

- The process by which a characteristic spreads across space and over time
- Hearth = source area for innovations
- There are two main types of diffusion
- (1)Relocation
- (2)Expansion

## The Cultural Landscape

- A unique combination of social relationships and physical processes
- Each region = a distinctive landscape
- People = the most important agents of change to Earth's surface

# Unit 2 <br> Population 

## 13-17\% of the AP Exam

## Density

- Arithmetic
- Total pop/total land area
- Physiological
- Total pop/arable land
- Agricultural
- Farmers/arable land

## Population Pyramids

Copyright $\otimes$ Pearson Education, Inc., publishing as Benjamin Cummings.

- $90 \%$ of all people live NORTH of the equator
- $2 / 3$ of the world's population is concentrated in four regions:
- East Asia
- South Asia
- SE Asia
- Western Europe

## World Population Density

## The Demographic Transition

Fig. 2-13: The demographic transition consists of four stages, which move from high birth and death rates, to declines first in death rates then in birth rates, and finally to a stage of low birth and death rates. Population growth is most rapid in the second stage.

## Theories of Population Growth

- Thomas Malthus
- 1798
- British economist
- First critic to note that the

## Exponential vs. Linear Growth

- Population increases = GEOMETRIC (exponential growth)
- Food supply increases = ARITHMETIC
(linear growth)

## Population Issues and Policies

- Aging population
- Overpopulation

## Migration

- Immigration
- Emigration
- Ravenstein's Laws of Migration
- 1885- British
- Most migrants = young, unmarried, males
- Most move to places that are close, to cities

## Global Migration Patterns

- From Asia to Europe
- From Asia to North America
- From South America to North America
- INTERregional - between regions
- INTRA-regional- within one region

## U.S. Immigration Patterns (3)

- Colonization
- Emigration from Europe
- Immigration since WWII

# Unit 3 <br> Cultural Patterns and Processes 

## 13-17\% of the AP Exam

## Schools of Thought

- Environmental Determinism
- Possibilism
- Environmental Perception
- Cultural Determinism

## Concepts of Culture

- Non-material vs material
- Acculturation
- Assimiliation
- Transculturation
- Syncretism

## Language

- Chinese = most spoken (as a first language)
- Indo-European languages = 50\% of languages spoken in the world

## Unit 5

Agriculture and Rural Land Use

## 13-17\% of the AP Exam

## Agricultural Hearths

- Root/Vegetative
- Seed

## Agricultural Revolutions

- $1^{\text {st }}$ Agricultural Revolution
- Domestication
- $2^{\text {nd }}$ Agricultural Revolution
- 1600s- Western Europe
- Enclosure movement
- $3^{\text {rd }}$ Agricultural Revolution
- Late 1800s
- USA
- Industrialization of Farming Process
- Agribusiness

## Types of Agriculture

- Subsistence
- Commercial

## Von Thunen: Agricultural Location Theory

- $19^{\text {th }}$ century- German economist

## Von Thünen Model

Fig. 10-13: Von Thünen's model shows how distance from a city or market affects the choice of agricultural activity in (a) a uniform landscape and (b) one with a river.

## Example of Von Thünen's Model

- The example shows that a farmer would make a profit growing wheat on land located less than 4 kilometers from the market.
- Beyond 4 kilometers, wheat is not profitable, because the cost of transporting it exceeds the gross profit.
- More distant farms are more likely to select crops that can be
 transported less expensively.

## Application of Von Thünen's Model

- Von Thünen based his general model of the spatial arrangement of different crops on his experiences as owner of a large estate in northern Germany during the early nineteenth century.
- He found that specific crops were grown in different rings around the cities in the area.
- Von Thünen did not consider site or human factors in his model, although he recognized that the model could vary according to topography and other distinctive physical conditions.
- The model also failed to understand that social customs and government policies influence the attractiveness of plants and animals for a
 commercial farmer.
- Although von Thünen developed the model for a small region with a single market center, it also applies to a national or global scale.

## Green Revolution

- Part of the $3^{\text {rd }}$ Agricultural Revolution
- Started in 1940s
- Hybrid seeds and fertilizers
- Higher-yielding varieties of wheat, rice, and maize crops
- Successful in India
- Many criticisms

# Unit 6 <br> Industrialization and Economic Development 

## $13-17 \%$ of the AP Exam

## Types of Economic Activities

- Primary
- Secondary
- Tertiary
- Quaternary
- Quinary

## Industrial Revolution

- 1750s-1850s
- England
- Coal and Steel
- Industry = textile
- Fueled by mercantilism and capitalism

## Ford Production

## Weber's Least Cost Theory

FIGURE 1

FIGURE 4

$$
\begin{aligned}

& \text { Unit Cost } \\
& \text { (Transp) }
\end{aligned}
$$

Weber's Weight-Losing Case

## HDI- Human Development Index

- Life expectancy
- Average educational levels
- Standard of living
- GDP
- Total value of outputs of foods and services produced in a country over one year

## North-South Divide

## Rostow's Model - the Stages of Economic Development

http://www.bized.co.uk/virtual/de/copper/theory/th9.htm

In 1960, the American Economic Historian, WW Rostow suggested that countries passed through five stages of economic development.

## Stage 5 High Mass Consumption

| In 1960, the American Economic Historian, WW Rostow suggested that countries passed through five stages of economic development. | Stage 5 High Mass Consumption <br> consumer oriented, durable goods flourish, service sector becomes dominant |
| :---: | :---: |
| Stage 4 Drive to Maturity diversification, innovation, less reliance on imports, investment |  |
| Stage 3 Take Off <br> Industrialisation, growing investment, regional growth, political change |  |
| Stage 2 Transitional Stage specialization, surpluses, infrastructure | According to Rostow development requires substantial investment in capital. For the economies of LDCs to grow the right conditions for such investment would have to be created. If aid is given or foreign direct investment occurs at stage 3 the economy needs to have reached stage 2. If the stage 2 has been reached then injections of investment may lead to rapid growth. |
| Stage 1 Traditional Society subsistence, barter, agriculture |  |

# Unit 7 <br> Cities and Urban Land Use 

## 13-17\% of the AP Exam

## Walter Christaller (1930s)

Used to describe the pattern of urban places

| KEY |
| :---: |
| City |
| Town |
| Market Town |
| $\circ$ Village |
| $\|\mid$ |

Central Place Theory

## Central Place Model: Variables

- Hinterland = rural areas serviced by central places
- Threshold = minimum number of people needed
- Range= maximum travel distance
- Spatial competition

## Rank Size Rule

- $n$th largest city's population size $=1 / n$ the size of the regions largest city popultion
- $4^{\text {th }}$ largest city $=1 / 4$ the size of the regions largest city's population size

## Megacities

- Over 10 million inhabitants
- NYC
- Mexico City
- Cairo
- Jakarta

## Borchert Model of Urban Evolution

## Studied US cities:

- Sail-Wagon Epoch (1790-1830),
- Iron Horse Epoch (1830-1870), characterized by impact of steam engine technology, and development of steamboats and regional railroad networks.
- Steel Rail Epoch (1870-1920), dominated by the development of long haul railroads and a national railroad network.
- Auto-Air-Amenity Epoch (1920-1970), saw growth in the gasoline combustion engine
- Satellite-Electronic-Jet Propulsion (1970-?), also called the High-Technology Epoch

## Basic vs Non Basic

- Basic = brings money into an urban place
- Automobile manufacturing
- Non-basic
- shifts money within the city, but doesn't bring money in
-service jobs

## Concentric Zone Mode

- 1920s- $1^{\text {st }}$ one- Chicago- Ernst Burgess

CONCENTRIC ZONE MODEL

## Sector Model 1930s- Hoyt

Hoyt Sector Model Key
